1   Support of WIBU licenses

IbaLogic can now also handle WIBU licences.

This means that WIBU software licences are also possible as WIBU hardware dongle.

If MARX and WIBU licences are available, a licence is first searched for in the MARX dongle and then in the WIBU environment.

The following licences are available. Only the type of dongle must be specified when ordering.

32.500001	ibaLogic-V5	Graphical online signal calculation and processing
32.500002	ibaLogic-V5-Lite	Graphical online signal calculation and processing - dongle free
32.500005	ibaLogic-V5 Timing Diagnostics	Extended Diagnostics
32.500009	ibaLogic-V5 upgrade with 64-DatFileWrite	License with 64 signals per runtime system
32.500010	ibaLogic-V5 upgrade 64 to 256-DatFileWrite	License extension to 256 signals per runtime system
32.500011	ibaLogic-V5 upgrade 256 to 1024-DatFileWrite	License extension to 1024 signals per runtime system
32.500020	ibaLogic-V5-Interface-RFM-Access	Interface for data exchange via Reflective Memory
32.500021	ibaLogic-V5-Interface-Profibus-DP-Master	Inferface for Profibus DP Master
32.500030	ibaLogic-V5-DB ACCESS	License for ibaLogic-V5 Function Block for DB Access
32.500035	ibaLogic-V5-DLL-SDK	OEM agreement required, incl. 3 days training at iba or via Teamviewer
32.500036	ibaLogic-V5-DLL-Runtime	DLL runtime license
